## DYNEEMA® BOWROPE

12 Strand Synthetic Fibre Replacement Winch Rope

[www.dyneema®bowrope.com](http://www.dyneema®bowrope.com)

DYNEEMA® BOWROPE is available in several sizes for off-road winches and commercial winches fitted to Recovery Vehicles:

### List Prices

- |   |                 |
|---|-----------------|
| • 5mm diameter rated at 2,500 kgs (5,500 lbs) for small winches up to 3,000 lbs   | £2.45 per metre |
| • 6mm diameter rated at 3,220 kgs (7,080 lbs) for small winches up to 5,000 lbs   | £2.90 per metre |
| • 8mm diameter rated at 7,300 kgs (16,060 lbs) for small winches up to 6,000 lbs  | £4.40 per metre |
| • 10mm diameter rated at 9,800 kgs (21,560 lbs) 9,000, 9,500 and 10,000lb winches | £5.42 per metre |
| • 11mm diameter rated at 12,600 kgs (27,720 lbs) for 11,000 and 12,000 lb winches | £5.81 per metre |
| • 12mm diameter rated at 16,000 kgs (35,200 lbs) for 14,000 and 15,000 lb winches | £7.36 per metre |

All these sizes are much stronger than their equivalent wire ropes, yet **DYNEEMA® BOWROPE** is only 15% of the weight of wire rope. In fact our specially produced product is now even stronger, size for size, than any other make in the world by using special manufacturing processes.

### DYNEEMA® BOWROPE FEATURES:

- VERY LIGHT
- EASY TO HANDLE
- VERY STRONG
- EASILY SPLICED
- DOES NOT CURL
- FLOATS
- HIGHLY VISIBLE
- EASY ON THE HANDS
- COMPACT
- LESS EFFORT IN USE
- DOES NOT KINK
- SAFETY IN USE
- NO MORE WIRE ROPE 'SPIKES' TO CATCH IN THE GLOVES
- IDEAL FOR EXTENSION WINCH ROPES AS WELL
- IF IT DID BREAK, LIKE ANY WIRE ROPE COULD DO IN A RIDICULOUS SCENARIO, **DYNEEMA® BOWROPE** WILL NOT FLAIL. VERY IMPORTANT

### DYNEEMA® BOWROPE ADVANTAGES:

When 'winching and driving' out in the field, and starting to gain grip, your winch assistant can simply take up the slack, run ahead easily, unhook and off you go. Or, as you gain grip, simply unhook and throw the **DYNEEMA® BOWROPE** into the spare wheel - or a box - on the bonnet and off you go to the next section. Try doing that with a wire rope!

Maybe you are about to winch up a very steep bank. Simply send your winch assistant up to the top with the tree strop and literally 'throw' the **DYNEEMA® BOWROPE** and hook up to him or her. Try doing that as well with a wire rope!

My guess is that once you have experienced using and handling **DYNEEMA® BOWROPE** you will never go back to using wire ropes again.

Just read again all the features above. Your winch on the front becomes at least 10 Kgs lighter! More with larger winches. **DYNEEMA® BOWROPE** is so much easier to handle, use, rig and stow away. All with less effort.

**DYNEEMA® BOWROPE** will not damage the layers of rope on the drum below if pulled tight down between wraps. And when using the swingaway snatchblock, if one part of the rope rubs against the another, problems should not occur as it does with wire ropes.

**DYNEEMA® BOWROPE** buy it, use it and enjoy it, with safety in use.
