

# Launching Simon Rafferty's new X-Zag Dyneema<sup>®</sup> Bowrope synthetic winch rope protector which has lots of other uses as well!

It will protect your synthetic rope if you need to winch over a bank. Made from corrosion resistant Stainless Steel tube, it is lightweight but very strong.

The unique shape allows it to slide sideways, but also allows it to be wedged in a hollow to keep the cable on a particular line.

Unlike any other device, it will hug a tree allowing you divert the rope round a tree without having to rig a snatch block and tree stop.

You can rig the X-Zag without detaching the rope - just a bit of slack.

The X-Zag doubles as a wheel chock and it helps you change heavy wheels by lifting the wheel so that the studs line up with the holes in the wheel.

The X-Zag makes a useful and safe saw bench if you need to cut up logs. You can then use it to stop them rolling if you carry the logs on a trailer or your roof.

Once you've cut and carried the logs, combined with a Waffle, they make a decent fire-side bench seat. Ok - we admit - this is stretching it a bit! You have to admit though, there are few single bits of kit with so many potential uses besides what it was designed for!

Even if you only ever use it to protect your Dyneema<sup>®</sup> Bowrope, it will pay for itself time and time again prolonging the life and increasing the safety of the synthetic winch rope.

*"It's marvellous—one of the best bit of off-road kit ever!" - J.Y. Kelly*

Order one now at just £51 plus £10 carriage, plus VAT—or two for £85 plus 10 carriage plus VAT.
